

# Web 2.0

## Building Your Digital Tool Belt (for Branding and Beyond)

Ryder Smith, Tripepi Smith

TRIPEPI SMITH

# Examples

## Web 1.0

static working website  
with links to other  
content on the web

## Web 2.0

focus on user interactivity,  
usability and interoperability  
across multiple digital  
platforms

Building Your  
Digital Tool Belt

# Examples

## Web 1.0

- Britannica Online
- City Newsletter Scanned as a PDF
- Holiday Parade Broadcast on Local Gov Station

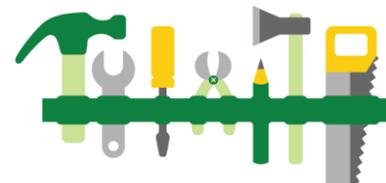

## Web 2.0

- Wikipedia
- E-Notification, Virtual Town Hall
- Short YouTube videos of all major city events recorded and hashtagged

# What Does Web 2.0 Mean for Local Government?

- More ways to communicate with residents than ever
- Movement from website strategy to internet strategy
- Decentralization of information creates more opportunity for engagement, but also makes fragments audience

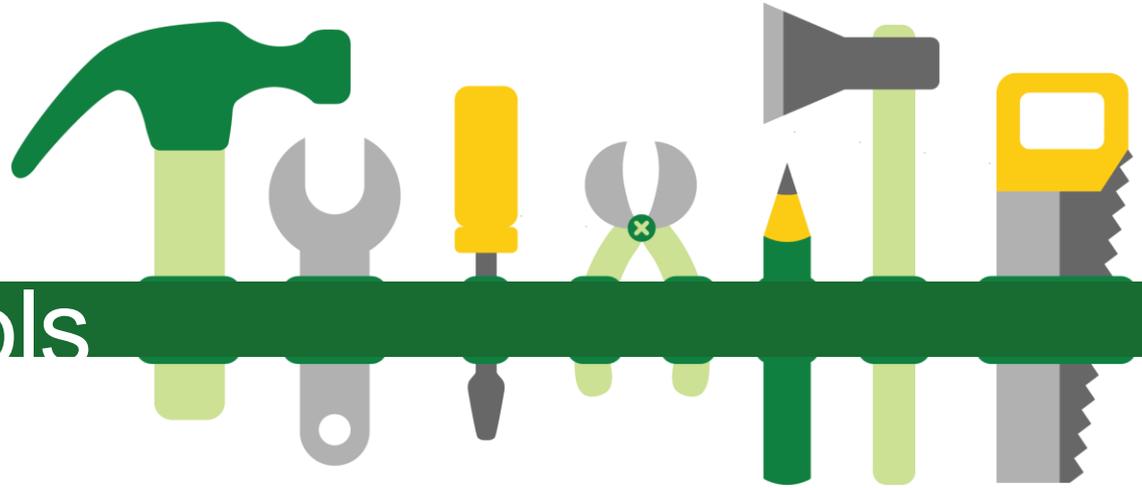

# Basic Tools

- Website
- Newsletter/E-Newsletter
- Notification System
- Facebook
- Twitter
- Public Meeting Audio/Video

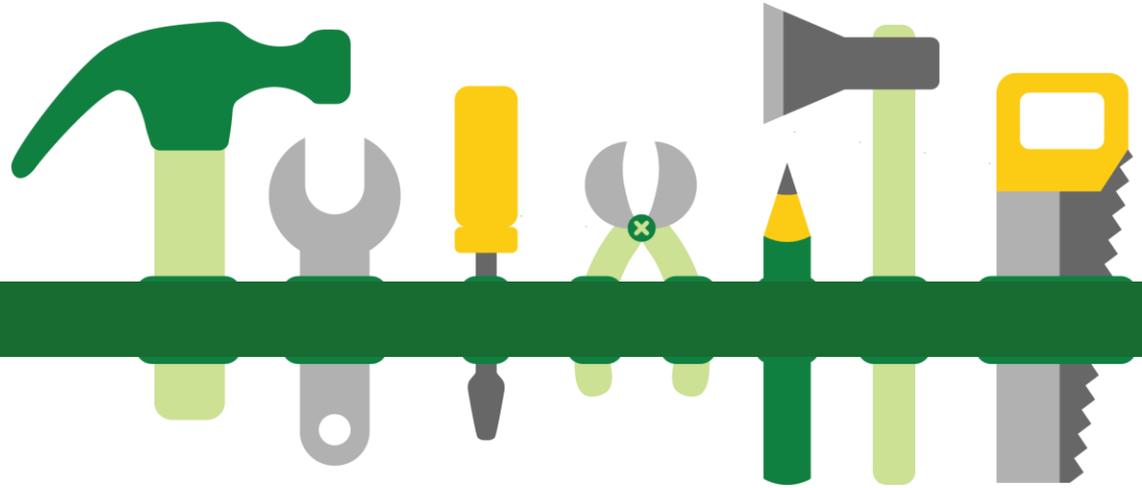

# Intermediate Tools

- Government-specific social media (OpenGov, Nextdoor, Nixle)
- Government Transparency Center
- Comcate, Trak-It, Accela

# Advanced Tools

- Agency App
- Interactive GIS
- Regular Television Show/Podcast
- Digital Public Meeting  
(mySidewalk, Open Town Hall)

# Choosing Internet 2.0 Tools

## Guiding Principles

- Content is king
- Consistency is queen
- Know your organization
- Know your community
- You can put lipstick on a pig, but people know better
- It is better to do a few things well than many things poorly
- Be sure your organization matches your tools
- Every community is different, use this as your guide rather than what other organizations are doing

# Web 2.0 and Branding

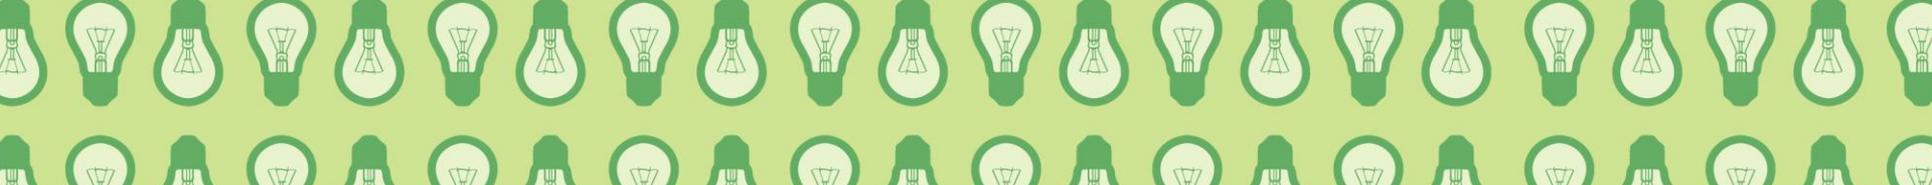

- More than ever, local governments are realizing the importance of branding for their organization and their communities
- Effective local government branding illustrates attributes and defining characteristics, as well as organizational values and goals
- Even if your organization has not engaged in a full branding process, your community likely still has an associated brand

# Communicating & Branding in a Web 2.0 World

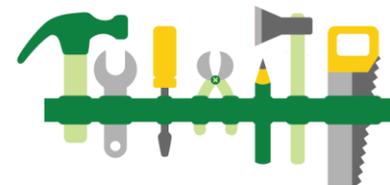

## Guiding Principles

- Ensure all digital communications platforms match organization style guide
- Approach website and apps with a designers eye
- Meaningful content can enhance your brand
- Take full advantage of new branding functions on social media platforms
- Do not be afraid to re-evaluate what is working, and what is not working

Building Your  
Digital Tool Belt

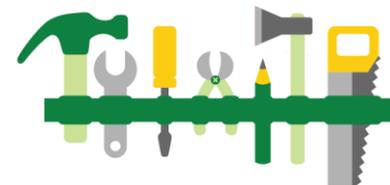

# Emerging Trends and the Future of Internet 2.0

- Social media platforms are adding features that encourage users to stay on the site, leading to a further diaspora of information
- Social media presence and marketing moving to a paid model
- Responsive design websites and the rise of mobile use brings into question the future of apps
- Lifecycle of social media platforms and websites is changing
